FIRE CHIEF
EVERY DEPARTMENT. EVERY LEADER.

"We have PSIN also display the three closest fire hydrants to the scene - that's crucial when responding."

- Aaron McKnight

Firefighter-Paramedic, Delhi Township

"Most beneficial for our drivers is PSIN's real-time mapping feature when there's a run."

- Lieutenant Jason Gunning

Station 82

"PSIN helps us better communicate what's needed for daily operations with all our employees across all stations."

- Joe Lyons

Fire Chief, Westfield

"PSIN works out great, because we can see all information that we need at the start of our shift quickly and easily."

- Captain Jason Lemons

What is PSIN?

PSIN are digital dashboards for fire stations. The screens keep everyone in the loop and provide all you need to know at a glance. The system visualizes all the information firefighters need to have in the firehouse: Run details, maps, radars, internal memos, burn permits, apparatus status, road closures, hydrant service schedule, shift vacancies, turnout times, units responding, social media feeds, traffic cameras, building layouts... you name it!

Keep Everyone
Informed

Enhance Situational
Awareness

How Does PSIN Work?

PSIN pulls information from any data source that you define and visualizes this information on a purpose-screen to keep everyone at the station in the loop. Every PSIN installation is unique to the department and even specific to the station the digital screens are set up in. PSIN runs on autopilot and doesn't require you to learn a CMS. Any changes you make in the data source will be reflected automatically on the digital dashboards.

Requirements :

PSIN Dashboards require power and an Internet connection - preferably Wifi. You can utilize your own TV screens for it, however we recommend using commercial grade digital signage displays that are built for 24/7 operation.
